

## **DTBA Construction AB**

Environmental policy

2nd edition

DTBA Construction AB company's performed business activities have a direct and inevitable impact on the environment through the use of materials, use of transportation and human capital.

Nonetheless, company's aim is to reduce the impact on the environment and continue to improve to the lowest footprint possible. From the year 2017 DTBA Construction AB commits to take and control its compliance with the following measures in order to reduce the impact on the environment.

### I. The use of materials.

Company commits to follow the environmental laws and control waste management, in addition conducting educational staff training on the waste management and waste prevention.

### II. The use of transportation.

Company commits to control and reduce CO2 emissions. Company further commits to dedicate percentage of its yearly profits for the upgrades of vehicles as well as replacement with lower CO2 emissions or electric batteries.

DTBA Construction AB has set these long term goals in its environmental policy on the bases of the legal requirements and the evaluation of environmental aspects' impact from the companies involvement into to the various activities in order to provide the service.
